

Samir Shaikh

Full Stack Developer | TypeScript, React, Next.js, Node.js, GraphQL, PostgreSQL
Surat, Gujarat, India (Open to Remote) • +91 8320927182 • shaikh.samir.work@gmail.com
Portfolio • GitHub • LinkedIn

Summary

Full Stack Developer with hands-on production experience architecting scalable web applications across the **React/Next.js** frontend and **Node.js/Express/GraphQL** backend. Proven record of cutting API latency by **30%** through DataLoader and Redis caching, shipping end-to-end relational schemas and granular **RBAC** systems solo in 30 days, and deploying containerized microservices with Docker and BullMQ. Eager to deliver clean, production-grade features from day one with minimal ramp-up.

Technical Skills

Languages: TypeScript, JavaScript (ES6+), SQL, HTML5/CSS3
Frontend: Next.js (App/Pages router), React.js, Redux Toolkit, Context API, Tailwind CSS, shadcn/ui
Backend & APIs: Node.js, Express.js, GraphQL (Apollo Server/Client), RESTful APIs, WebSockets, Socket.io
Databases & Caching: PostgreSQL (Prisma, Sequelize), MongoDB (Mongoose), Redis (Caching & Session Store)
DevOps & Architecture: Docker, Docker Compose, BullMQ (Task Queues), CI/CD (GitHub Actions), Prometheus, Grafana
Engineering Practices: RBAC, Microservices, API Rate Limiting, N+1 Optimization, Jest, Git/GitHub

Work Experience

Full Stack Developer Intern

Aug 2026 – Sep 2026

Xira Infotech

Vapi, India

- **Solo End-to-End Delivery:** Rebuilt a static job board into a dynamic, production-ready full-stack platform within 30 days, taking full ownership from database design to frontend deployment.
- **Backend Architecture & DB Design:** Architected normalized PostgreSQL schemas and built 15+ REST API endpoints in Node.js/Express, eliminating hardcoded data and enabling sub-100ms job search queries.
- **Dynamic Frontend Migration:** Refactored static Next.js pages into dynamic client/server-rendered views, integrating real-time job listings, search filtering, and applicant tracking workflows.
- **Security & Monetization:** Implemented JWT-based Role-Based Access Control (RBAC) for candidates and recruiters, custom admin dashboards, and integrated Razorpay payment gateway for job postings.

Backend Developer Intern

Sep 2025 – May 2026

Logicwind

Surat, India

- **Query Optimization & Caching:** Reduced production GraphQL API latency by **approx. 30%** by diagnosing and resolving N+1 resolver queries via **DataLoader** and implementing a multi-tiered **Redis caching** layer.
- **Microservice Schema Architecture:** Engineered server-side Node.js microservices with Apollo Server; authored modular GraphQL schemas, resolvers, and custom directives for high-concurrency client requests.
- **Automated Email & CRM Workflows:** Integrated third-party APIs (Dittofeed, Loops, Reoon Email Verifier) into GraphQL mutation pipelines, automating user onboarding verification and drip campaigns.
- **Cross-Functional Agile Delivery:** Collaborated with frontend engineers and QA in 2-week Agile sprints; authored API documentation in Postman and diagnosed edge-case production bugs.

Featured Projects

AI Customer Ticket Triage Platform

Live Demo / Repo

Tech Stack: Node.js, TypeScript, Next.js, GraphQL, Redis, BullMQ, Docker, Prometheus

- Built an event-driven microservices backend (6+ services) integrating LLM classification APIs to parse, tag, and prioritize customer support tickets with dynamic SLA scoring.
- Designed asynchronous background processing pipelines using **Redis** and **BullMQ**, decoupling ticket ingestion from LLM latency to handle burst traffic without request timeouts.
- Developed a dual-portal dashboard in Next.js with HTTP Long Polling for sub-second ticket status synchronization; instrumented system health using **Docker Compose**, **Prometheus**, and **Grafana**.

Sahara Tyre – WhatsApp Campaign Automation

Live Demo / Repo

Tech Stack: Node.js, Express, React Native, TypeScript, Socket.io, Google Sheets API

- Engineered an automated bulk messaging platform with a React Native (Expo) mobile client and Express.js REST backend, reducing customer outreach time by over 70%.
- Designed a resilient queue processor integrating Google Sheets API with rate-limited batch delivery to adhere to strict WhatsApp Web API concurrency thresholds.
- Handled continuous session persistence using Socket.io and automated zero-downtime deployment pipelines via GitHub Actions and Render.

Eventify – Full-Stack Event Management Platform

Live Demo / Repo

Tech Stack: React, Node.js, Express, MongoDB, GraphQL (Apollo), Tailwind CSS, JWT

- Architected a full-stack event platform supporting role-based user authentication (JWT, bcrypt, OTP verification) and automated transactional emails via Nodemailer.
- Implemented hybrid REST and GraphQL endpoints backed by MongoDB/Mongoose with connection pooling and Zod runtime schema validation.

Education & Certifications

Bachelor of Technology in Information Technology

2022 – 2026

Uka Tarsadia University

CGPA: 7.99 / 10.0

Certifications: Cloud Computing Fundamentals (Udemy) • Cybersecurity Fundamentals (Udemy)
